

**INCIDENT MANAGEMENT SITUATION REPORT**  
**THURSDAY, OCTOBER 27, 2005 – 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL 2**

**CURRENT SITUATION:**

Initial attack activity was light nationally with 79 fires reported. Three new large fires were reported, two in the Southern Area and one in the Eastern Great Basin Area. Three large fires were contained, two in the Southern Area and one in the Eastern Great Basin Area. Very high to extreme fire indices were reported in Montana, Nebraska, South Dakota, Wyoming and Arizona.

Presidential Disaster Declarations have been issued for Hurricanes Katrina, Rita and Wilma in Mississippi, Alabama, Louisiana, Texas and Florida. An Area Command Team (Williams-Rhodes) is coordinating relief operations in Louisiana and Texas (FEMA Region VI). The Marietta Mobilization Center in Marietta, GA continues to house and in-brief resources prior to assignment.

A link to a map with resources mobilized for hurricane response is located at [http://gacc.nifc.gov/sacc/predictive/intelligence/Resource\\_Map.pdf](http://gacc.nifc.gov/sacc/predictive/intelligence/Resource_Map.pdf).

**SOUTHERN AREA INCIDENTS / LARGE FIRES:**

HURRICANES KATRINA AND RITA SUPPORT, Federal Emergency Management Agency. Emergency Support Function (ESF) #4 at the state Emergency Operations Centers in Jackson, MS and Baton Rouge, LA are staffed.

Six Type 2 Incident Management Teams (Morcom, Goheen, Floyd, Carlson, LaFave and Koehler) are assigned.

Morcom: managing base camps at Gulfport and Vancleave, MS. Preparation to demobilize Vancleave Camp is in progress.

Goheen: managing a mobilization center and base camp at Camp Beauregard, near Pineville, LA. No new information was reported.

Floyd: managing a receiving and distribution center at Barskdale Air Force Base, Bossier City, LA.

Carlson: managing the Jackson Support Base in the New Orleans French Quarter and supporting several satellite camps in southern Louisiana.

LaFave: supporting receiving and distribution of supplies from Stennis Space Center, MS.

Koehler: managing a logistics staging area at Lakeland, FL.

HURRICANE WILMA SUPPORT, Federal Emergency Management Agency. The Regional Response Coordination Center is currently staffed in Atlanta, GA. An Emergency Operations Center is staffed in Tallahassee, FL.

Two Type 1 Incident Management Teams (Pincha-Tulley and Gelobter) are assigned.

Gelobter: managing the Jacksonville Operational Staging Area at Jacksonville, FL, and the receiving and distribution of relief supplies.

Pincha-Tulley: coordinating receiving and distribution operations and supporting military relief operations at Homestead Air Force Base, FL.

BEETLE, National Forests in Florida. This fire is 12 miles north of Sumatra, FL, in timber and Southern rough. Drought conditions in a dry swamp, along with high winds are contributed to high rates of spread.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN
BEETLE	FL	FNF	1,400	50	10/30	50	1	6	0	0	40K	FS

BULLHEAD BAY	FL	FLS	350	100	---	7	0	0	1	0	NR	PRI

TXS - Texas Forest Service

FLS – Florida Division of Forestry

### EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

MARSHALL BUTTE, Twin Falls District, Bureau of Land Management. This fire is 25 miles west of Rogerson, ID in grass and brush. Minimal fire behavior was reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN
MARSHALL BUTTE	ID	TFD	4,000	98	UNK	22	0	7	0	0	NR	BLM
ELK MOUNTAIN	UT	NWS	640	100	---	18	1	1	0	0	125K	ST

NWS - Northwest State, Utah State Division of Forestry Fire & State Lands

### OUTLOOK:

**Weather Discussion:** Dry conditions will persist along most of the Gulf Coast region. A large low pressure system will continue to spread showers across the northwest quarter of the county as it progresses inland. Dry and windy conditions will develop out ahead of the weather system across the Rocky Mountain Area.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Southern California</b> Areas of morning low clouds and fog to the lower coastal slopes, otherwise partly to mostly cloudy with isolated to scattered showers over the northern part of Central California.	50 to 65 mountains. 60 to 70 valleys. 65 to 75 upper deserts. 80 to 90 lower deserts.	50 to 70% Central California, and 30 to 50% Southern California.	Southwest to northwest 10 to 20 mph.

### **WILDLAND/URBAN INTERFACE—STRUCTURE PROTECTION**

The primary consideration of any operation is to assure firefighter and public safety. It is a must to assess potential fire behavior, ingress/egress routes, nature of the threat, hazardous materials, and available water supplies before engaging in the protection of any structure.

● Factors that may make an attempt to save a structure hopeless or too dangerous include:

- The fire is making a sustained run and there is little or no clearance between the structure and the fuel.
- The fire behavior is extreme; spot fires are numerous and the spread is outpacing containment.
- Water supply will not last as long as the threat of the fire.
- The fire's intensity dictates that you leave the fire area immediately.
- The structure is constructed of wood and has a wood, shake roof.
- The roof of the structure is more than one-quarter involved.
- There is fire inside of the structure or windows are broken and there is no way to quickly repair them.
- You can't safely remain at the structure because your escape route could become unusable.

● When implementing a plan to protect structures, consider the following:

- Don't enter a burning structure unless you are trained, equipped, and authorized. Firefighter safety and survival is the number one priority.
- Always stay mobile and wear all of your PPE.
- Back in equipment to allow for a quick escape.
- Coil a short, 1 ½", charged line with fog nozzle on your engine for safety and quick knock down capability.
- Don't make long hose lays. Keep at least 100 gallons of water reserve in your tank.
- Check the road system before the fire approaches. Know bridge limits, alternate access routes, and turnarounds for your vehicle and other support vehicles.
- Determine if residents are home. Leave on the inside and outside lights, regardless of the time of day. Close the garage door.
- Place the owner's ladder at a corner of the home on the side with the least fire threat.
- Coil and charge garden hoses.
- Check and mark hazmat; e.g., LPG, pesticides, and paint storage.
